

Fit.

OOLAB's quality custom orthotics offer the ultimate in support, stability and comfort for your patients' needs. Our orthotic shell options and a life-time warranty were designed with your patients in mind.

Function.

Our orthotics work for your patients and we work for you. OOLAB's unparalleled turn around, customer service and technical support are geared toward making things easier for practitioners. Our focus is not only on our products but also on supporting your practice.

Fashion.

People's tastes are as unique as their orthotics. That's why we stock a wide variety of brand name accommodative footwear for sport, dress or everyday. Giving patients the support they need with the style they want.

footprint 3D Laser Scan

The truly portable, self-positioning handheld footprint laser scanner accurately obtains negative foot impressions to the standard of Plaster of Paris casting. The footprint is a highly innovative 3D scanning device

that proves extremely useful and efficient in the fields of orthotics and prosthetics. Thanks to quick shape acquisition and very high accuracy, the footprint technology allows the production of customized and perfectly-fitted devices and makes for reduced turnaround times. Plus, it offers a great alternative to traditional, tiresome and messier methods like plaster casts and foam.

- Clean & easy
- Non invasive
