The Rosseau Muskoka Resort and Spa

Guests will enjoy luxurious surroundings and magnificent views overlooking Lake Rosseau.

Named one of the ten best resort views by National Geographic, this Canadian resort boasts an array of indoor and outdoor activities year-round, including a year-round indoor-outdoor pool and the luxurious Spa Rosseau, offering an array of treatment options.

Only 2-1/2 hours north of Toronto, the resort is located in an area formerly referred to as Red Leaves. Enjoy an unpretentious Muskoka resort experience featuring classic, sophisticated design. Sample scrumptious Italian cuisine at award-winning Teca restaurant, recipient of the Wine Spectator Award of Excellence in 2012 and 2013. Get closer to nature by connecting with local naturalists and artists; after a full day of outdoor activities, retreat to your spacious studio or suite and relax in front of an exquisite stone fireplace.

PODIATRIC DERMATOLOGY SEMINAR:
Dermatology Update &
An Introduction to
Dermoscopy

Enjoy an early summer getaway while updating on podiatric dermatology. This educational meeting aims to act as an update in the subject of foot dermatology and will start by looking at skin assessment and then focussing on the common foot dermatoses seen in practice and how they may be managed. Skin tumours will also be covered and the day will include a discussion of some newer developments in the treatment of foot infections such as warts and fungal foot infections.

Dermoscopy is a relatively new technique which has been widely adopted across Europe in the field of Dermatology to assist in the assessment of pigmented and other types of skin lesion. This simple hand held device allows the user to visualize structure deeper in the skin, not visible to the naked eye improving diagnostic accuracy. This introductory session will cover the basic principles of Dermoscopy and allow delegates the opportunity to try out these devices. In addition, there will be a presentation on melanoma and the foot discussing a simple technique to assist in the recognition of suspicious lesions, ensuring early referral.

Dr. Ivan Bristow PhD, FFPM FRCPS (Glasgow), FCPodMed

Ivan Bristow works as a Podiatrist and is currently employed at the Faculty of Health Sciences, University of Southampton where he has led the BSc(Hons) Podiatry programme for a number of years. Since the commencement of his career, he has held a strong interest in dermatology establishing the first foot dermatology clinic in the UK in 1992. He has continued his career, obtaining a Master’s Degree from the University of Oxford and promoting podiatric dermatology worldwide working with podiatrists, dermatologists and general practitioners on various education programmes. He has co-authored four textbooks and published over 65 professional and academic papers on the topic of foot dermatology. His doctoral thesis (by publication) focused on his research into the early recognition of foot melanoma. He is the Dean at the Faculty of Podiatric Medicine, College of Podiatry, London and was elected to Fellowship at the Faculty of Podiatric Medicine at the Royal College of Physicians and Surgeons in Glasgow. His contribution to foot dermatology has been recognized with awards for his education and research in this area.
