

The CFPM Launches Three New Footcare Products

Skin Softening Foot Spritz

Instructions: Apply daily to the callused areas of the foot. Wait for several minutes. Use a foot file, such as a kupa stone to gently debride the calluses. If redness occurs immediately discontinue use.

The active ingredient of urea has a skin conditioning agent and humectant, as well as, exfoliant properties to provide an excellent foot conditioning spritz.

Active Ingredients: Urea USP 20%
Purified Water, Urea USP, Propylene Glycol, Benzalkonium Chloride

Enzyme Foot Cream

Instructions: Apply daily to entire foot (except between the toes) paying special attention to callused areas. Massage thoroughly for several minutes. You may feel a slight tingling which is a result of the bromelain working. If redness occurs immediately discontinue use.

The active ingredient of bromelain provides anti-inflammatory action and skin debridement properties to the foot in combination with the emollient quality of urea, to provide an excellent foot cream.

Active Ingredients: Urea USP 10%, Bromelain 2400GDU 2.5%
Ingredients: Purified Water, Oryza Sativa (Rice) Bran Oil, Urea USP, Behentrimonium Methosulphate, Cetearyl Alcohol, Lanolin USP, Glycerine, Bromelain (2400 GDU), Phenoxyethanol, Caprylyl Glycol

Skin Softening Foot Cream

Instructions: Apply daily to entire foot (except between the toes). If redness occurs immediately discontinue use.

The active ingredient of urea provides emollient qualities in combination with the keratolytic properties of salicylic acid and soothing characteristics of peppermint to provide an excellent foot cream.

Active Ingredients: Urea USP 10%, Glycolic Acid 1%, Salicylic Acid 1%
Purified Water, Oryza Sativa (Rice) Bran Oil, Urea USP, Behentrimonium Methosulphate, Cetearyl Alcohol, Lanolin USP, Glycerine, Glycolic Acid, Salicylic Acid, Mentha Piperita (Peppermint) Oil, Mentha Viridis (Spearmint) Leaf Oil, Phenoxyethanol, Caprylyl Glycol, Parfum
